ABOUT ME

I'M SOUGUIR ABDEL AZIZ

3D ARTIST | PRODUCT VISUALIZER

With 2 years of experience in the creative field, I specialize in 3D design, product design, and product visualization using Blender. I create high-quality 3D models and photorealistic renders for products, branding, and commercial presentations. Passionate about details, materials, and realistic visualization, I combine creativity, precision, and functionality to bring ideas to life.

My work

1- Personal Project – Hnaya de Zaghouan Faucet Kit

This 3D design project focuses on the creation of a complete faucet kit inspired by the architectural form of the Hnaya de Zaghouan, a symbol of Tunisian hydraulic heritage. The goal was to combine cultural heritage with contemporary design through elegant, functional, and intelligent forms. Developed with a product-oriented approach, the project incorporates materials such as brass with a hammered copper-inspired finish, while also enhancing the user experience through innovative features, including a scented steam diffusion system for the shower. This project highlights my skills in 3D modeling, product design, and conceptual visualization.

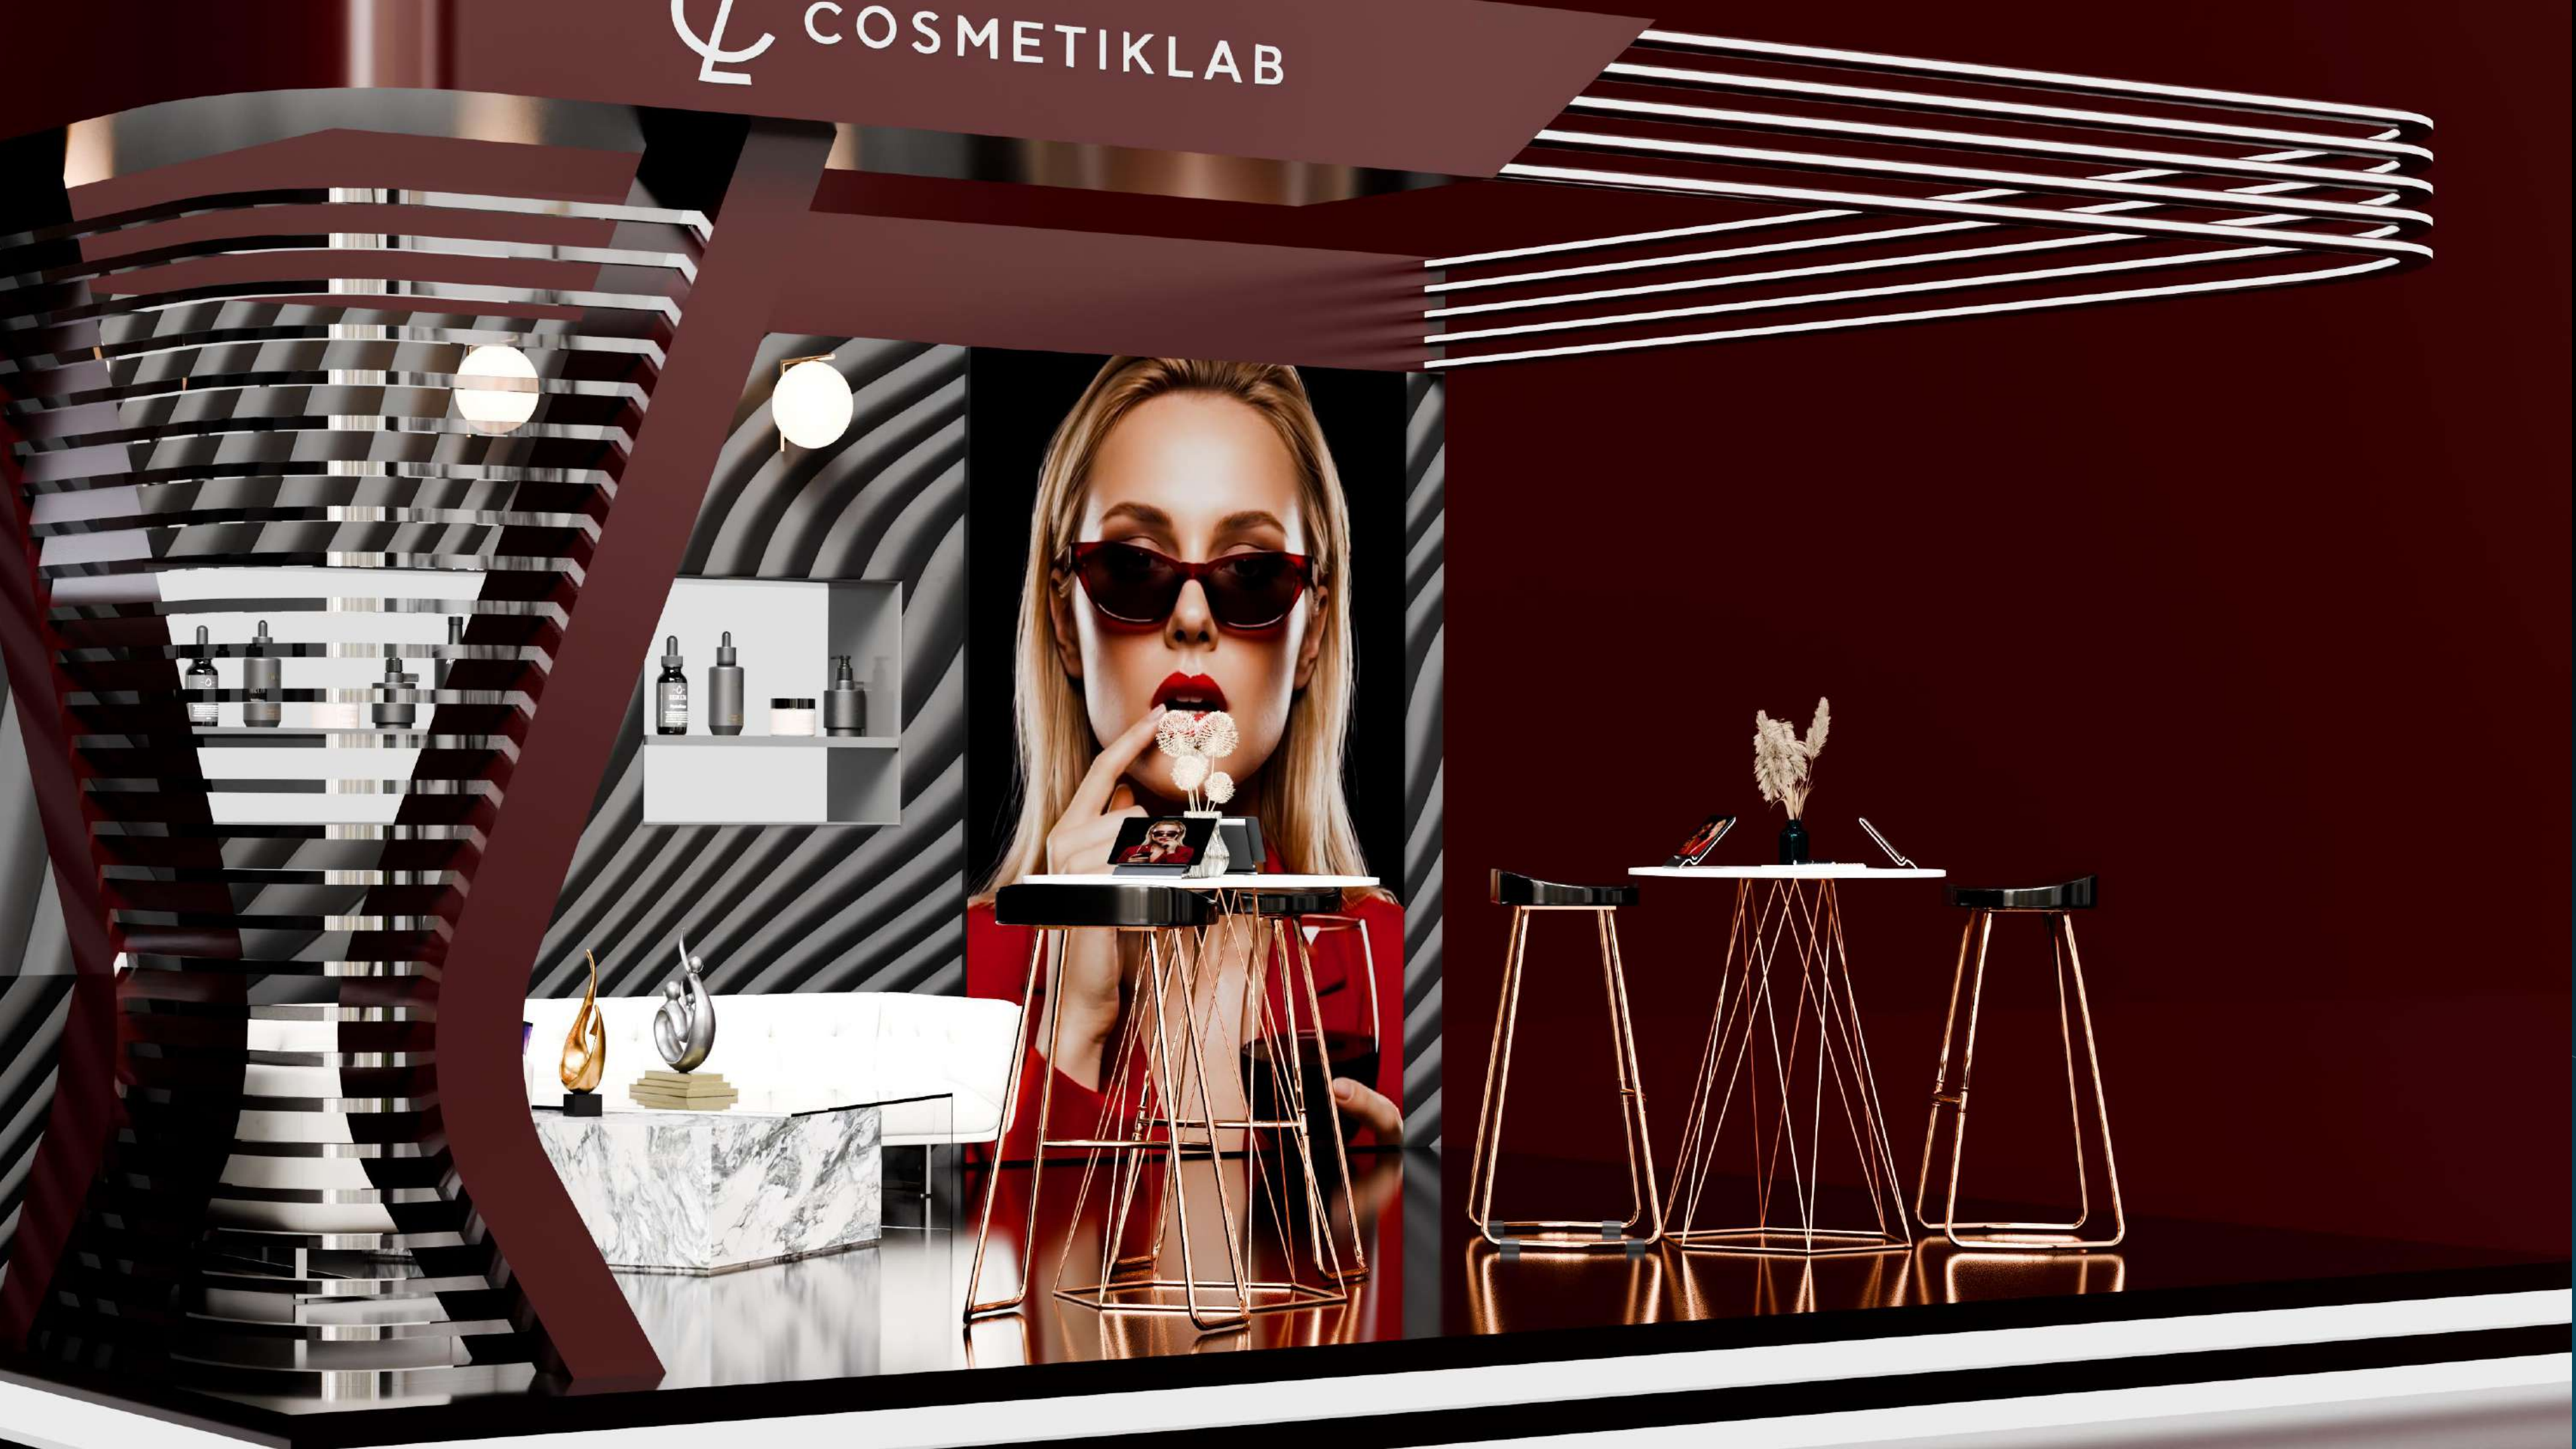

2- Project - Cosmetic Brand Stand Design

This 3D project presents a high-end cosmetic exhibition stand designed for the brand “COSMETIKLAB.” The concept focuses on creating a luxurious and immersive brand experience within a fair environment, combining bold architectural geometry with premium material contrast. The space integrates dark wavy wall panels, warm copper structural frames, and soft ambient lighting to emphasize product elegance and visibility. Carefully arranged display shelves highlight the cosmetic line as key visual elements, while the lounge area enhances visitor comfort and engagement. The composition balances branding, functionality, and visual storytelling, resulting in a refined exhibition space that reflects modern beauty industry standards and strong brand identity.
