

Accounting Academy Platform

Secure LMS, Consultations & Referral System

A modern accounting education ecosystem combining secure online courses, consultation booking, referral growth, and finance law updates in Tunisia.

Built for accounting academies and professional educators looking to scale their business digitally with automation and premium user experience.

Project Overview

This platform is a complete digital ecosystem designed specifically for accounting academies and finance educators. It combines secure online learning, Google Meet consultations, referral marketing, and finance news management into one scalable solution.

The platform helps academies automate operations, improve student engagement, and generate multiple revenue streams through online education and professional consulting services.

Core Features

Learning Management System

- Secure course access after payment validation
- Protected video lessons
- Student dashboard and progress tracking
- Quizzes, assignments, and downloadable resources
- Notifications and reminders

Consultation System

- Free 15-minute consultation booking
- Google Meet integration
- Paid consultation scheduling
- Automated email confirmations
- Calendar and booking management

Referral System

- Referral code generation
- Invite tracking
- Reward and commission system
- Referral analytics dashboard

Finance Blog System

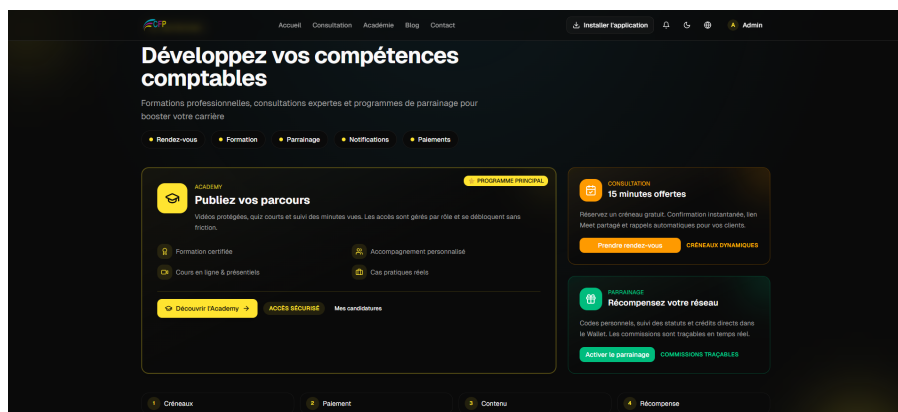

- Tunisian finance law updates
- Accounting and tax articles
- SEO optimized content management
- Search and filtering system

Technical Architecture

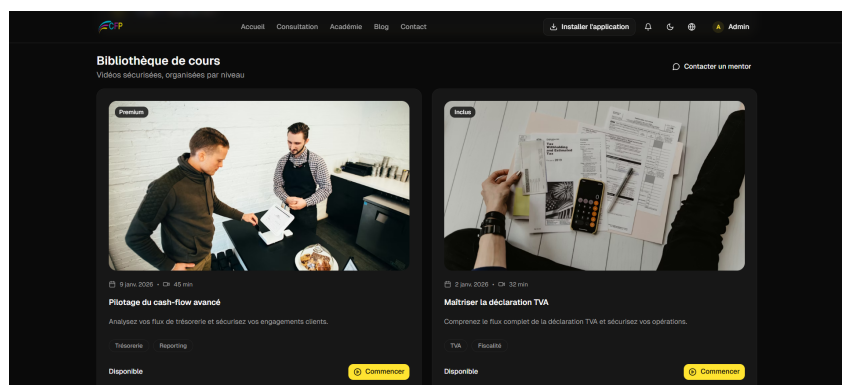

- Frontend: Next.js, React, TailwindCSS
- Backend: Node.js API Routes
- Database: PostgreSQL with Prisma ORM
- Authentication: NextAuth.js
- Video Protection: Secure cloud streaming
- Email System: Brevo API
- Deployment: Vercel

Academy Lessons Interface

Admin Dashboard

User Journey

1. User discovers the platform through search or referrals
2. User enrolls in academy courses
3. Secure access is granted after payment
4. Student watches lessons and tracks progress
5. User books consultation sessions
6. User stays engaged through finance news updates

Business Benefits

- Multiple revenue streams
- Automated academy management
- Improved student retention
- Professional digital branding
- Scalable infrastructure
- Reduced administrative workload

Deliverables

- Full source code
- Admin dashboard
- Deployment setup
- Technical documentation
- Responsive frontend and backend
- Post-launch support

Why Choose This Platform

Unlike traditional LMS systems, this platform combines secure education, professional consultations, referral marketing, and localized finance updates into one integrated ecosystem designed specifically for the accounting industry.
